

SPEC SHEET
ABS™ Aqua Trampoline

A woman with her hair in a bun, wearing a teal long-sleeved wetsuit, is captured mid-jump on an Aqua Trampoline. She is smiling and has her arms outstretched. The background is a pool of water with splashing. The entire scene is framed by a teal border on the left and bottom.

DESIGNED FOR FUN

TODAY'S DEFINITION OF WATER FITNESS:

- Fun
- Result's Driven
- Inclusive of All Ages

Results are just a benefit!

A smaller version of the Aqua Body Strong logo is located in the bottom left corner of the teal border.

- 2-year limited manufacturer's warranty included
- Nationally Recognized Certification Training Included

PRODUCT INFO

Aqua Body Strong™ is the only water trampoline on the market designed for commercial use and engineered to ensure superior safety and stability. Featuring a 6-point anchoring suction cup system and handlebars, aquatic centers, health clubs, city pools, and resorts worldwide trust Aqua Body Strong™ for their classes.

- Six points of adhesion create a sturdy anchoring system. Participants are able to safely and securely execute all exercises on the trampoline without it moving about the pool floor. It protects the participants and the pool.
- The handlebars add an additional level of comfort for beginning students or those who may be rehabbing an injury. Having a handlebar is a great perk. It not only allows the participant to feel more confident in their movements but also allows for suspended exercises like those one would normally do on the wall.
- The large jump pad allows taller individuals room to execute the movements with precision.
- A highly elastic water sports trampoline means it's easier to bounce on while being extremely low to no impact.
- Instructors are certified and trained to teach Aqua Body Strong™ Aqua Trampoline, which is a Recognized Fitness Provider by AEA. Combining the knowledge and experience of our Aqua Body Strong™ Advisors, which includes fitness trainers, coaches, and competitive athletes in multiple disciplines, we have created the ultimate certification platform for aqua trampoline. Our ABS™ Teacher Training course is safety-oriented, content-rich, and designed to ensure your instructors can teach to all fitness levels.

Additional Perks

- **Personalized trampolines featuring your facility's logo and brand colors are available.** Gain recognition and take

advantage of the marketing opportunities made through social media by putting your logo on the jump pad.

- **6 CEU credits from AEA.** Instructors certified through Aqua Body Strong™ receive continuing education credit.
